

**All Purpose Contact Adhesive Spray
500ml**

Sprayable glue which bonds to most common materials including wood, concrete, stone, tiles, rubber, foam, metals, ridged plastics, polyethylene, canvas fabrics, cardboard, paper and cork. Ideal for securing most carpets/floor coverings. Suitable for internal and external use, giving permanent or temporarily adhesion.

**All Purpose Contact Adhesive
125ml & 250ml**

It is a rubber based contact adhesive suitable for use with a wide variety of materials both professional and DIY use. The product may be used internally and externally for bonding decorative laminates, all types of wood, rigid PVC, ABS, leather, cork, linoleum, rubber, stone, metals and dense fabrics

Mitre Kit

Mitre Kit is intended for the rapid bonding of mitred MDF joints during the assembly of valances, pelmets and decorative trims in the installation of kitchen units and fitted bedroom and office furniture. Other uses include the rapid bonding of plastics, rubbers and wood.

Contact Adhesive DR704 1 & 5L

Recommended for: Laminated plastic, decorative hardboard, plywood, aluminium, steel, rubber, flexible cork sheeting & leather.

Resin Injection System

Large 380ml
Small 150ml
Injection Gun for Large Cartridge
Spare Nozzle for Large or Small Cartridge

Resin Injection Gun

Used for the Large cartridges

PU Rapid Setting Adhesive

suitable for use in all types of joinery, and construction and repair applications application where a strong permanent bond is required between porous - porous and porous - non-porous surfaces including windows, doors, staircases architrave's, boat building, fixing of carpet grippers to concrete and wooden floors, etc. The adhesive is highly water-resistant and can be used in applications where regular wetting and/or high humidity is anticipated.

Universal PVA Bonding & Sealing 5L

Used for joinery, carpentry, concreting rendering, screeding, floor laying, plastering, tiling, sealing & bonding and as an adhesion promoting & plasticizing admixture in cement, motar and plaster mixes.

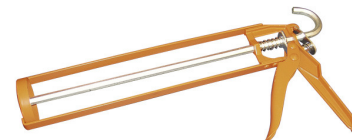

Pro Silicone Gun

- Steel skeleton gun
- Handle with plunger & release clip
- Gun for application of sealants & adhesives
- Will accept all standard silicone tubes.

Liquid PU

An all-round durable, flexible adhesive and sealant based on MS Polymer technology. Has excellent adhesion to non-porous surfaces, will bond to damp surfaces and is paintable with most paints. This product is odourless, neutral and free of isocyanates. Conforms to ISO 11.600 25HM.

USES: Suitable for sealing joints around sanitary fixtures, weatherproofing joints around windows and doors, glazing systems, joints and assemblies in coach body work. For gluing panels, skirting boards, windows, thresholds, mirrors and insulation materials. Will seal and bond glass, porcelain, coated metal, epoxy and polyester panels, polystyrene, UPVC, stainless steel, anodised aluminium and finished wood. On porous surfaces such as concrete a primer is recommended. Can also be used as a universal filler for cracks and uneven surfaces.

Silicone Gun

- Steel skeleton gun
- Handle with plunger & release clip
- Gun for application of sealants & adhesives
- Will accept all standard silicone tubes.

High Strength Gap Filling Adhesive

Fixing aluminium and PVCu nosings and extrusions to concrete and wooden stairs. Carpet gripper systems to most sub floors without using tacks or nails. Most types of wall cladding, direct wall studding, internal wall surfaces or timber battens. Direct fixing of battens, architrave, etc. to walls without other fixings. Fixing floor boarding and skirting boards Adhesion is excellent to brick, concrete, blockwork, wood, plywood, chip-board, hardboard, plasterboard, insulation materials (except polystyrene), laminated plastics metals and ceramics.

Glue Screws

A high strength, quick grab bonding adhesive with gap filling properties that adheres to virtually all common building surfaces and replaces nails and screws in a multitude of applications.

USES: For fixing skirting boards, decorative wall panelling, door surrounds, timber and PVCu cladding, floor boards, timber framework, worktops, floor grippers and metal edges, carpet, brick veneer, mouldings, ceramics, plasterboard, cork, laminates and automotive trims. Can be used on rough or smooth surfaces, internally or externally.

Water Resistant Glue 5 & 1L

An easy to use water resistant glue that bonds wood together to form a permanent and inseparable joint. Ideal for general woodworking and joinery uses. Not suitable for joints subject to continuous water immersion. Conforms to the requirements of Category D3 Classification of BS EN 204.

USES: For applications where a water resistant adhesive is required including joinery use and wall covering.

Resintite

Concentrated wood glue based on ureaformaldehyde resin. Resintite is easily mixed with water and once dry, forms a bond stronger than the wood itself. It may be used internally or externally and is water resistant

Universal Silicone

Available In

- White
- Clear
- Brown

A high modulus premium quality silicone that cures quickly to provide a permanently flexible rubber seal.

USES: For a wide range of building, glazing and household applications such as weather sealing around window and door frames, sealing around worktops and top sealing in glazing applications. Accommodates movement of + or - 25%.
Conforms to ISO 11.600 F12.E.

Bath & Sanitary Silicone

Available In

- White
- Clear

A premium quality acetoxy curing silicone containing anti-fungal compounds to prevent mould growth in areas subject to high humidity levels. Provides a long lasting, flexible watertight seal that is ideal for domestic or municipal applications.

Conforms to ISO 11.600 F&G20 LM.

USES: For sealing around baths, showers, basins and all types of sanitary ware and will adhere to most non-porous surfaces.

Forever White Silicone

Available In

- White

Waterproof tile adhesive and grout, with mould shield one of the worlds leading anti-bacterial solutions integrated into the manufacturing process.

Guaranteed to stop mould, mildew and bacterial growth not only on grout lines but also protects against the long term deterioration of adhesive strength which can occur when bacterial growth attacks the adhesive behind the fixed tile.

For showers, bathrooms, wetrooms & kitchens, power shower proof & repels water.

Glazing Silicone

Available In

- Black

A top quality acetoxy curing silicone developed specifically for glazing applications. Also suitable for general purpose applications where adhesion to non-porous surfaces is required. It is tack free within minutes to form a tough elastic rubber seal.

Conforms to ISO 11.600 F&G20 LM.

USES: Typical uses include: top sealing in glazing, sealing metal cladding and curtain walling, sealing in refrigeration stores, sealing around worktops. Temperature resistant between -50°C and +180°C. Accommodates movement of + or - 25%.

L.M.A Silicone

Available In

White
Clear
Brown

A multi purpose low modulus construction grade acetoxy silicone that provides a permanently watertight flexible rubber seal on most common building substrates.

Conforms to ISO 11.600 F&G20 LM.

USES: For sealing around window and door frames. Cap glazing and remedial work. For sealing glass to glass and glass to aluminium. Sealing cladding.

All Weather Silicone

Available In

Clear

A universal co-polymer sealant that can be used for a wide range of sealing and weather-proofing applications around the home and in industry. Can be applied in wet weather and damp conditions.

USES: Provides a superior adhesion to most surfaces such as glass, aluminium, lead and zinc. Can be used in building, glazing, roofing and ductwork applications and for emergency repairs in wet weather. Over paintable with most paints and stains.

Lead Sheet Sealant

Available In

Grey

A high quality flexible mortar that gives good adhesion to lead and most roofing substrates. It cures by reaction with atmospheric moisture to give a flexible, permanent weatherproof seal.

Conforms to ISO 11.600 G25 LM.

USES: Specifically formulated to point lead into brickwork. Also suitable for sealing most common roofing materials.

Polysulphide Sealant

Available In

White
Brown

A one part polysulphide sealant designed to seal joints subject to movement where a tough, flexible, watertight seal is required. This product is easy to apply and has good adhesion to most building substrates. Has excellent durability and is paintable with alkyd resin paints.

Conforms to BS EN ISO 11.600 F20 HM.

USES: Suitable for perimeter joints around wood and metal window and door frames.

Paintable Silicone

Available In
White

glazing systems and cap beading * parameter sealing. In general Window Seal Plus may be used, also without primer, to seal assemblies of glass, glazed surfaces, porcelain coated metal, anodised aluminium finished wood, and several plastics. Porous substrates require a primer. Paintable with many alkyd resin based paints, emulsion based paints and varnishes. For best results apply paint within a few days after application of the sealant.

Sili-Kill

Removes cured silicone sealants and to give a silicone free surface.
